Dear New Patient,

Congratulations for putting your health first and deciding to investigate Naturopathic Medicine. I am confident that you will greatly expand your knowledge of your health care options and I look forward to sharing that experience with you.

Together we will endeavor to achieve your health goals. In order to understand you as a whole, I need to gather a significant amount of information. One the most efficient and therefore cost-effective tools I have is this comprehensive set of in-take forms. Please do your best to be thorough in filling them out, but if you don't understand or don't feel comfortable with a question, leave it out and proceed from there.

Please drop off your completed forms to my office prior to your visit. I will then have an opportunity to assess the information and make good use of your time during your scheduled appointment. Alternatively, you may fax your package to 897-1797.

My office is located at 448-10th Street in Courtenay in a house/office. If you turn at the Dairy Queen on Cliffe Ave., that will put you on 10th Street and we are 1.5 blocks up on the left between England and Fitzgerald Ave.

If the clinic is not open when you wish to drop off your forms, please seal the envelope, put your name on it, and place it in the **mail slot** of the front door. I am the only person who reviews these forms and your confidentiality will be strictly maintained. I sincerely thank you for sharing this important information with me and look forward to our first visit!

Love and blessings,

Dr. Deidre Macdonald
Naturopathic physician

(P.S. Out of consideration for my patients with allergies and chemical sensitivities, I request that you refrain from wearing perfume or cologne on the days you will be visiting our office. Thank you.)

The Philosophy of Naturopathic Medicine

THE HEALING POWER OF NATURE

The healing process is ordered and intelligent. The body has the inherent ability – the vitality – not only to heal itself and restore health, but also to ward off disease. Illness is not caused simply by an invasion of external agents or germs, but is a manifestation of the organism’s attempt to defend and heal itself. The physician’s role is to identify and remove agents blocking the healing process, bolster the patient’s healing capacity, and support the creation of a healthy internal and external environment.

TREAT THE WHOLE PERSON

Health and disease result from a complex interaction of physical, mental, emotional, genetic, spiritual, environmental, social, and other factors. The harmonious function of all aspects of the individual is essential to health. Within the body, the different systems are intimately connected, dynamically balanced. “Dis-ease” or imbalance in one part directly affects – may cause disease in – other parts of that whole. There is never a single cause for disease. All of the “pieces” must be integrated in order to create a whole picture of an individual and his/her illness. Therapy can then be directed at underlying as well as immediate causative factors, thus treating the whole person.

FIRST DO NO HARM

Respecting the inherent ability of the organism to heal itself, the physician must be ever-mindful of the consequences or side effects of treatment. The more gentle and non-invasive the therapy, the less disruptive it will be to the patient’s integral whole. Whenever possible, suppression of symptoms is avoided as suppression may interfere with the healing process.

IDENTIFY AND TREAT THE CAUSE

Illness does not occur without cause, and symptoms (nausea, rash, headache) are not the cause of illness. Symptoms are signals that the body is out of balance and are an expression of the body’s attempt to heal itself. Causes originate on many levels, but are often found in the patient’s lifestyle, diet, habits, or emotional state. When only the symptoms are treated, the underlying causes remain and the patient may develop a more serious, chronic condition.

PREVENTION IS THE BEST CURE

Health is a reflection of how we choose to live. Physicians help patients recognize their choices and how those choices affect their health. The physician assesses risk factors and hereditary susceptibility to disease and makes appropriate intervention to prevent illness.

DOCTOR AS TEACHER

The original meaning of the word “doctor” was “teacher”. A physician is a facilitator for a patient’s healing process. One of a physician’s principle responsibilities is to educate the patient and encourage self-responsibility for health. A cooperative doctor-patient relationship has inherent therapeutic value.
